generator-express `public`

`build` `passing` `npm` `v2.15.0` `downloads` `1k/month`

An Expressjs generator for Yeoman, based on the express command line tool.

Features

- Basic or MVC style file structure
- CoffeeScript Support
- Gulp or Grunt build tools with file watching and livereload
- .editorconfig for consistent coding styles within text editors
- Support View engines:
  - **Jade**
  - **Handlebars**
  - **Swig**
  - **EJS**
  - **Marko**
  - **Nunjucks**
- Supported CSS pre-processors
  - SASS (both node-sass and ruby sass)
  - LESS
  - Stylus
- Supported Databases (with MVC structure):
- MongoDB
- MySQL
- PostgreSQL
- RethinkDB
- SQLite

Getting started

- Make sure you have **yo** installed: `npm install -g yo`
- Install the generator **globally**: `npm install -g generator-express`
- Run: `yo express` and select Basic. Add `--coffee` if you require CoffeeScript.
- Run: `grunt` or `gulp` to run the local server at `localhost:3000`, the grunt/gulp tasks include live reloading for views, css in public/css and restarting the server for changes to app.js or js in routes/

MVC apps

A generator for creating MVC style apps in express. Giving you the choice between the supported databases.

To get going:

- Make sure you have **yo** installed: `npm install -g yo`
- Install the generator **locally**: `npm install generator-express`
- Run: `yo express`, select MVC and select your database of choice. Add `--coffee` if you require CoffeeScript.
- Ensure that the selected database is running on your machine, if running elsewhere the connection string can be changed in `config/config.js`
- Run: `grunt` or `gulp` to run the local server - defaults to `localhost:3000` - port can be changed in `config/config.js`. The grunt/gulp tasks include live reloading as before.

Unleash awesomeness

Private packages, team management tools, and powerful integrations. Get started with npm Orgs

`npm i generator-express`

Try it out

Test generator-express in your browser.

Keywords

yeoman-generator, express, scaffold

Dependencies (4)

glob, mkdirp, underscore.string, yeoman-generator

Dependents (1)

generator-soa

Options

- `--coffee`

  Uses CoffeeScript.

- `--skip-install`

  Skips the automatic execution of `bower` and `npm` after scaffolding has finished.

Testing

Tests are written with mocha.

- Install: `npm install -g mocha`
- Run: `mocha` or `npm test`
